

## **Strategic Road-mapping Workshop**

22 February 2011

M-Brussels Village, 44 rue des Palais, B-1030 Brussels

***“Efficiency of European Innovation Programmes  
& recommendations for future implementation”***

### **10.30 Introduction and Context**

- ❖ The Innovation Union – 10 priorities for the future
- ❖ Presentation of Survey and Interview results
- ❖ Outline of Road-mapping methodology

### **11.00 Strategic road-mapping session (1) - The Broad Landscape**

Group activity in which the participants will populate a wall chart customized to examine the efficiency of innovation programmes, any gaps within the programmes and suggestions for improvement. This will essentially be a time versus activity matrix breaking down the current and future issues into broad layers.

### **12:30 Lunch Break**

### **13:00 Strategic road-mapping session (2) - The Dominant Priorities**

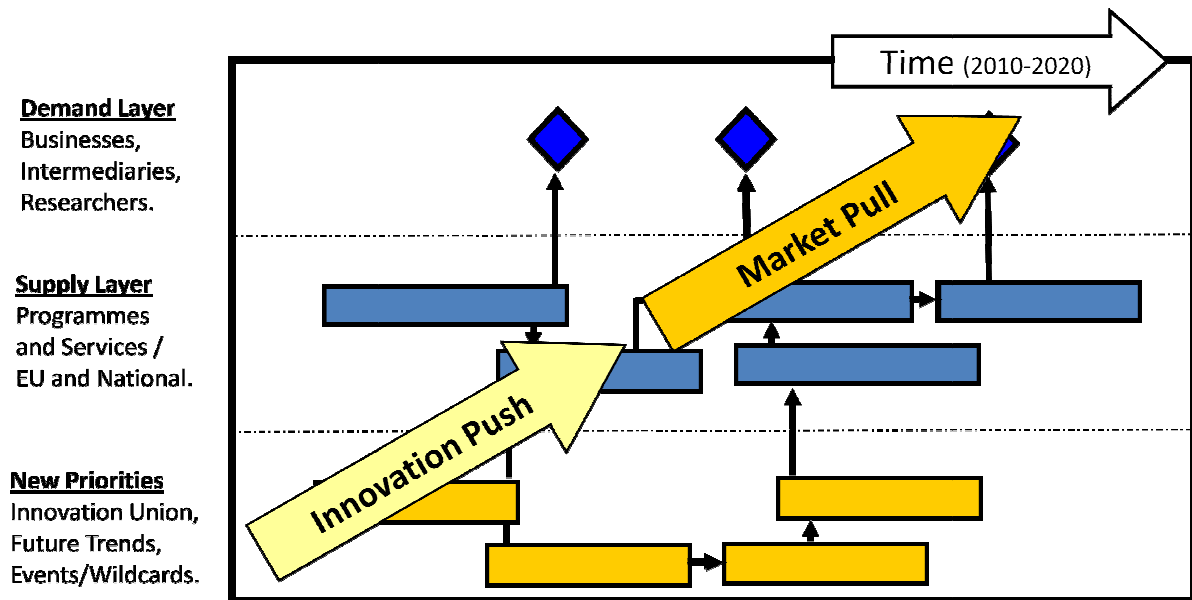

A facilitated session to review the wall chart and achieve consensus and identify key issues resulting from the earlier road-mapping exercise. The most important topics can then be isolated and analysed (time permitting) by using “Single Issue” maps.

### **14:00 Feedback and Next Steps**

Wrap up session summarising workshop results and framing recommendations to the EU about how Innovation programmes can be made more efficient and effective in the future.

### **14:15 Close**

## The Roadmap Framework

The discussion within the strategic road-mapping sessions will focus around 3 particular layers:

- 1) **Business priorities** – what will be the main economic drivers (by sector) over the next 10 years and what priorities will companies have (short, medium and long term)
- 2) **Knowledge based services** – how will research and innovation service providers adapt in response to the needs of actors and players (SMEs, R&D organisations etc)
- 3) **Innovation Union** – what effect will the proposed changes in policy have on the landscapes described above. Are they well aligned?
